Olawale Isreal Feranmi

Software Developer | Open to internships and entry-level roles | Nigeria

11isrealolawale@gmail.com | Portfolio | GitHub | LinkedIn

SUMMARY

Software developer in training working in JavaScript and Node.js, with a focus on data structures and algorithms, tested code and clear documentation. Built a REST API with SQLite persistence and an installable, offline-capable web app. Seeking an internship or entry-level software role.

SKILLS

Languages: JavaScript (ES modules), HTML, CSS, SQL (SQLite)

Backend and tools: Node.js, REST API design, OpenAPI documentation, SQLite, Git and GitHub, automated testing (node:test), Vercel

Browser APIs: localStorage, Service Worker and Cache API, Web App Manifest (PWA), Drag and Drop API

Computer science: Maps, Sets, linked-list queues, stable merge sort, state machines, Big-O time complexity

PROJECTS

Event Ticketing System (Node.js, SQLite)

DSA 2.0 capstone | Oct 2026 – Present (in progress) | github.com/Acedigitals/MY-DSA-PROJECT

- Built a REST API to create and publish events, search and filter them, book tickets, process mock payments, enforce booking ownership and cancel unpaid bookings.
- Implemented a stable merge sort (O(n log n)), a linked-list FIFO waitlist, Map-based booking lookup and an explicit booking state machine.
- Added SQLite persistence with an atomic seat-reservation update; a concurrent last-seat test confirms one successful booking and 49 sold-out responses.
- Wrote 26 automated tests (node:test, all passing) and documented the API with OpenAPI 3.0.

Daily Task Checker (JavaScript, PWA)

Personal project | Live demo | GitHub

- Built a vanilla JavaScript daily task app with local persistence, automatic midnight reset and customizable default task templates.
- Implemented completion tracking, delete with undo, drag-and-drop and button reordering, and keyboard-accessible controls with ARIA labels.
- Added offline support with a Service Worker (network-first caching) and installability through a Web App Manifest; includes light and dark themes.
- Deployed on Vercel.

TRAINING

DSA 2.0 – Data structures and algorithms program | Sep 2026 – Dec 2026 (in progress)

TS Academy – Software development program | Oct 2026 – Mar 2027 (in progress)
